Sir Robert Falconer,
TORONTO UNIVERSITY.

Dear Sir Robert,

I arranged for a young man Norman Vincent to apply for registration in the Special Course at the Faculty of Applied Science in Chemical Engineering, but was advised that it was too late for entrance and while the Committee which sat on the admission stated that it would have admitted had his qualifications warranted, it did not find any qualifications which justified them in letting him in.

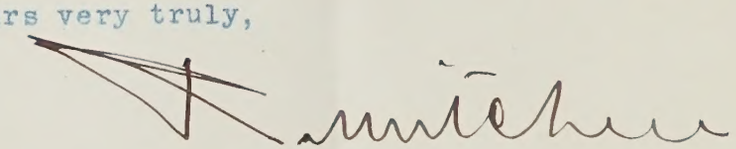
Personally I have every confidence that Vincent has many qualifications for entrance under special conditions even outside his previous education. He has Junior Matriculation and completed and passed his First year in Queen's in French, English and Mathematics in 1917, was in the Flying Corps until end of November 1918 (crashed at Borden 1917, instructing, at Physics Building, 1918).

Mr. Laing has advised that he go back to Queen's taking the Special Course there but I consider that if a special arrangement be made here that he would

acquit himself and the School creditably.

If this matter could be reopened I would appreciate it very much.

Yours very truly,



March 3rd, 1919

E. R. Mitchell, Esq.,

Traders Bank Building,

Toronto.

Dear Mr. Mitchell:

I have gone into the question of your letter with regard to Norman Vincent with Mr. Brebner, and talked the matter over carefully with him. The difficulty in his case is that he is now entering so late it will be almost impossible for him to get much result from even the extra classes that we are holding in the Faculty of Applied Science. I should think that the best way for him would be to take refresher courses in Chemistry, and possibly Mathematics, in the Faculty of Arts during this Summer Session, then he would be in a better position to enter the work next autumn. At this late date I think he would profit most by this course.

Yours sincerely,

President.

Sir Robert Falconer,
President,
University of Toronto,
TORONTO.

Dear Sir Robert,

Thanks very much for your letter of the 3rd., instant re Norman Vincent. I have made the suggestion to him that he would take this special course in chemistry as you advise.

Yours very truly,

P. H. Mitchell
